Reference: FCC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170  
and NSD File No. L-00-72.

Dear FCC:

I am a senior citizen living in Iowa. My annual income is \$14,000. I have a disability, live in Federally subsidized housing, and am being treated for diabetes at the local county hospital in Des Moines. I have no insurance and no assets. I have an elderly parent (87 years old), a single parent daughter and one grandchild in the city of Des Moines, a 45-mile round trip from me. I am able to get to the city to help my father and grandchild in a 6-year old car. I use Tracfone because it provides me with emergency communication during travel to and from the city, and because when I am not at home, I can be reached in an emergency. I DO NOT USE IT FOR THE CASUAL CONVERSATIONS SO OFTEN PROMOTED AS THE NORM FOR CELL PHONE USE! Of course, the planned raise in charges planned by the Federal Communications Commission will impact greatly on my ability to use or keep the cell phone.

I am therefore requesting that you DO NOT raise the charges before your commission for a vote.

Thanks.

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,

Judy Moseley
